# Memorandum

**To:** Mary Kay Voytilla, EPA, Seattle  
**CC:**  
**From:** Bill Hudson, CH2M HILL, Kellogg  
**Date:** 10/29/1  
**Re:** Review Comments for the ROD Amendment

2.1 3<sup>rd</sup> paragraph The Federal and State government assumed operation of the CTP in Nov 94----later CTP operated using BLP trust fund until Feb 96. -----Clear up the wording so people understand BLP operated the plant from Nov 94 to Feb 96.

3.0 3<sup>rd</sup> paragraph Milo Creed drainage was tried by the mining company in the 1950's.

6.3 Implementability 3<sup>rd</sup> paragraph These areas are also currently under industrial use----is this true?

7.1.1 3<sup>rd</sup> paragraph Due to safety concerns with a portion of the old drift, a new x-cut located in the West Fork drainage will be driven to access the raise area.

4<sup>th</sup> paragraph plugging of up to 20 drill holes located on the 5, 7, and 9 Levels. Better to be vague here to give us more leeway.

6.1.2 The mine owner has historically conducted these maintenance activities and is expected to do so in the future.

7.1.4 3<sup>rd</sup> paragraph .....current height of the mine pool, to the floor of 10 Level. This is the maximum storage capacity of the mine, actual storage area used would vary depending upon the needs.

Note: Reference in mine work needing cooperation of the current mine owner.

7.2 2<sup>nd</sup> paragraph Reference in mine work needing cooperation of the current mine owner.

General comment: consistency on SFCdA River in document

Very good document overall.
